Education and Training: Teaching Multi Language Learners 331036 (2026–2027)

Understand Language Acquisition Theories: Students will explore foundational theories of second language acquisition, including any applicable sociocultural theories related to basic interpersonal communications skills and cognitive academic language. Students will understand how these theories inform effective strategies for teaching multilingual learners (MLLs). 1	1 **Understand Language Acquisition Theories: Students will explore foundational theories of second language acquisition, including any applicable sociocultural theories related to basic interpersonal communications skills and cognitive academic language. Students will understand how these theories inform effective strategies for teaching multilingual learners (MLLs).** 1
Apply Effective Instructional Strategies: Students will learn to implement evidence-based instructional practices that promote language development while teaching academic content. This includes using strategies such as sheltered instruction, scaffolding, and differentiation to meet the diverse needs of multilingual learners acr pr	2 **Apply Effective Instructional Strategies: Students will learn to implement evidence-based instructional practices that promote language development while teaching academic content. This includes using strategies such as sheltered instruction, scaffolding, and differentiation to meet the diverse needs of multilingual learners across various language proficiency levels.** 2

Design Culturally Responsive Learning Environments: Students will learn to create inclusive classrooms that honor linguistic and cultural diversity. This involves integrating culturally relevant materials, practices, and pedagogies that validate students' home languages and experiences, enhancing engagement and promoting academic success. 3	**3 Design Culturally Responsive Learning Environments: Students will learn to create inclusive classrooms that honor linguistic and cultural diversity. This involves integrating culturally relevant materials, practices, and pedagogies that validate students' home languages and experiences, enhancing engagement and promoting academic success.** 3
Assess Language and Academic Progress: Students will learn to assess multilingual learners' progress in both language development and academic content. This includes using formative and summative assessments, including language proficiency assessments, to monitor growth and adjust teaching strategies accordingly. 4	**4 Assess Language and Academic Progress: Students will learn to assess multilingual learners' progress in both language development and academic content. This includes using formative and summative assessments, including language proficiency assessments, to monitor growth and adjust teaching strategies accordingly.** 4
Foster Family and Community Collaboration: Students will learn how to engage parents and caregivers in the educational process, ensuring that they are active participants in supporting their children's academic and language development. 5	**5 Foster Family and Community Collaboration: Students will learn how to engage parents and caregivers in the educational process, ensuring that they are active participants in supporting their children's academic and language development.** 5
