Science: Grade 2

MATTER AND ITS INTERACTIONS	1a	Use data to describe different kinds of materials by their observable properties (e.g., color, texture). LC-2-PS1-1A
	1b	Use data to classify different kinds of materials by their observable properties (e.g., color, texture). LC-2-PS1-1B
	2a	Match a property of a material (e.g., hard, flexible, absorbent) to a potential purpose (e.g., hardness of a wooden shelf results in it being better suited for supporting materials than a soft sponge). LC-2-PS1-2A
	3a	Identify how a variety of objects can be built up from a small set of pieces. LC-2-PS1-3A
	4a	Identify examples of heating substances which cause changes that are sometimes reversible and sometimes not. LC-2-PS1-4A
	4b	Identify examples of cooling substances which cause changes that are sometimes reversible and sometimes not. LC-2-PS1-4B
ECOSYSTEMS: INTERACTIONS, ENERGY, AND DYNAMICS	1a	Use data to describe that plants need water and light to grow. LC-2-LS2-1A
	2a	Identify that plants need animals to move their seeds around. LC-2-LS2-2A
	2b	Identify a simple model that mimics the function of an animal in dispersing seeds or pollinating plants. LC-2-LS2-2B
BIOLOGICAL EVOLUTION: UNITY AND DIVERSITY	1a	Make observations to explain that different kinds of living things live in different habitats on land and in water. LC-2-LS4-1A
EARTH'S PLACE IN THE UNIVERSE	1a	Use evidence to understand that some Earth events happen quickly and can be observed (e.g., flood, volcano eruption, earthquake, or erosion of soil). LC-2-ESS1-1A
	1b	Use evidence to understand that some Earth events happen slowly (e.g., erosion or weathering of rocks). LC-2-ESS1-1B
EA		Identify a solution (e.g., using shrubs, grass, or trees) to slow or prevent wind from changing the shape of the land. LC-2-ESS2-1A

Skip to main content

2b **Identify a solution (e.g., using shrubs, grass, or trees) to slow or prevent water from changing the shape of the land.** LC-2-ESS2-2B

2a **Use a model to Identify land features and bodies of water (e.g., hill, lake) in an area using a model.** LC-2-ESS2-2A

3a **Use information to identify that water is found in many types of places.** LC-2-ESS2-3A

3b **Use information to identify that that water exists as solid ice and in liquid form.** LC-2-ESS2-3B
