

Middle School: English Language Arts and Reading, Reading, Reading (Elective Credit) (2008)

Introduction **A**

- 1** Reading offers students an opportunity to read with competence, confidence, and understanding through instruction in comprehension strategies, word recognition, and vocabulary. Middle school students read, write, listen, speak, and view to learn more about the world around them and to create, clarify, critique, and appreciate ideas and responses. Middle school students complete research projects or locate answers to questions using multiple texts and resources. In addition, middle school students continue to read on their own or listen to texts read aloud for the purpose of enjoyment. Middle school students read both printed texts and electronic media independently, bringing with them various strategies to aid in comprehension. Significant blocks of time are provided for reading both independent and instructional-level material for varied purposes such as collecting information, learning about and appreciating the writer's craft, and discovering models for their own writing. Middle school students respond to texts through various avenues such as talk, print and electronic formats, connecting their knowledge of the world with the text being read. For middle school students whose first language is not English, the students' native language serves as a foundation for English language acquisition and language learning. **A.1**
