Texas STAAR

Grade 6 Math Essence Statements (2026)

Numerical Representations and Relationships: The student will demonstrate an understanding of how to represent and manipulate numbers and expressions.	**Number and operations**	2 The student applies mathematical process standards to represent and use rational numbers in a variety of forms. (Readiness and Supporting Standard) 6.2
	Proportionality	4 The student applies mathematical process standards to develop an understanding of proportional relationships in problem situations. (Readiness and Supporting Standard) 6.4 5 The student applies mathematical process standards to solve problems involving proportional relationships. (Supporting Standard) 6.5
	Expressions, equations, and relationships	7 The student applies mathematical process standards to develop concepts of expressions and equations. (Readiness and Supporting Standard) 6.7
Computations and Algebraic Relationships: The student will demonstrate an understanding of how to perform operations and represent algebraic relationships.	**Proportionality**	4 The student applies mathematical process standards to develop an understanding of proportional relationships in problem situations. (Readiness and Supporting Standard) 6.4 5 The student applies mathematical process standards to solve problems involving proportional relationships. (Readiness and Supporting Standard) 6.5
	Expressions, equations, and relationships	10 Expressions, equations, and relationships 6.10
Geometry and Measurement: The student will demonstrate an understanding of how to represent and apply geometry and me	**Proportionality**	4 The student applies mathematical process standards to develop an understanding of proportional relationships in problem situations. (Readiness Standard) 6.4
	Measurement and data	11 The student applies mathematical process standards to use coordinate geometry to identify locations on a plane. (Readiness Standard) 6.11

Skip to main content

Data Analysis and Personal Financial Literacy: The student will demonstrate an understanding of how to represent and analyze data and how to describe and apply personal financial concepts.

Measurement and data

13 The student applies mathematical process standards to use numerical or graphical representations to solve problems. (Readiness and Supporting Standard) 6.13

Personal financial literacy

14 The student applies mathematical process standards to develop an economic way of thinking and problem solving useful in one's life as a knowledgeable consumer and investor (Supporting Standard) 6.14
