Washington Common Core Math

High School — Algebra

Adopted 2011

Standards for Mathematical Practice

1. **Make sense of problems and persevere in solving them.** CCSS.MATH.PRACTICE.MP1
2. **Reason abstractly and quantitatively.** CCSS.MATH.PRACTICE.MP2
3. **Construct viable arguments and critique the reasoning of others.** CCSS.MATH.PRACTICE.MP3
4. **Model with mathematics.** CCSS.MATH.PRACTICE.MP4
5. **Use appropriate tools strategically.** CCSS.MATH.PRACTICE.MP5
6. **Attend to precision.** CCSS.MATH.PRACTICE.MP6
7. **Look for and make use of structure.** CCSS.MATH.PRACTICE.MP7
8. **Look for and express regularity in repeated reasoning.** CCSS.MATH.PRACTICE.MP8

Seeing Structure in Expressions

A. **Interpret the structure of expressions** CCSS.MATH.CONTENT.HSA-SSE.A

1. Interpret expressions that represent a quantity in terms of its context CCSS.MATH.CONTENT.HSA-SSE.A.1
   a. Interpret parts of an expression, such as terms, factors, and coefficients. CCSS.MATH.CONTENT.HSA-SSE.A.1A
   b. Interpret complicated expressions by viewing one or more of their parts as a single entity. CCSS.MATH.CONTENT.HSA-SSE.A.1B
2. Use the structure of an expression to identify ways to rewrite it. CCSS.MATH.CONTENT.HSA-SSE.A.2

B. **Write expressions in equivalent forms to solve problems** CCSS.MATH.CONTENT.HSA-SSE.B

Skip to main content

3. Choose and produce an equivalent form of an expression to reveal and explain properties of the quantity represented by the expression. CCSS.MATH.CONTENT.HSA-SSE.B.3

   a. Factor a quadratic expression to reveal the zeros of the function it defines. CCSS.MATH.CONTENT.HSA-SSE.B.3A

   b. Complete the square in a quadratic expression to reveal the maximum or minimum value of the function it defines. CCSS.MATH.CONTENT.HSA-SSE.B.3B

   c. Use the properties of exponents to transform expressions for exponential functions. CCSS.MATH.CONTENT.HSA-SSE.B.3C

4. Derive the formula for the sum of a finite geometric series (when the common ratio is not 1), and use the formula to solve problems. CCSS.MATH.CONTENT.HSA-SSE.B.4

Arithmetic with Polynomials and Rational Expressions

A. Perform arithmetic operations on polynomials CCSS.MATH.CONTENT.HSA-APR.A

1. Understand that polynomials form a system analogous to the integers, namely, they are closed under the operations of addition, subtraction, and multiplication; add, subtract, and multiply polynomials. CCSS.MATH.CONTENT.HSA-APR.A.1

B. Understand the relationship between zeros and factors of polynomials CCSS.MATH.CONTENT.HSA-APR.B

2. Know and apply the Remainder Theorem: For a polynomial p(x) and a number a, the remainder on division by x - a is p(a), so p(a) = 0 if and only if (x - a) is a factor of p(x). CCSS.MATH.CONTENT.HSA-APR.B.2

3. Identify zeros of polynomials when suitable factorizations are available, and use the zeros to construct a rough graph of the function defined by the polynomial. CCSS.MATH.CONTENT.HSA-APR.B.3

C. Use polynomial identities to solve problems CCSS.MATH.CONTENT.HSA-APR.C

4. Prove polynomial identities and use them to describe numerical relationships. CCSS.MATH.CONTENT.HSA-APR.C.4

5. (+) Know and apply the Binomial Theorem for the expansion of (x + y) ⁿ in powers of x and y for a positive integer n, where x and y are any numbers, with coefficients determined for example by Pascal's Triangle. CCSS.MATH.CONTENT.HSA-APR.C.5

D. Rewrite rational expressions CCSS.MATH.CONTENT.HSA-APR.D

6. Rewrite simple rational expressions in different forms; write ^{a(x)}/_{b(x)} in the form q(x) + ^{r(x)}/_{b(x)}, where a(x), b(x), q(x), and r(x) are polynomials with the degree of r(x) less than the degree of b(x), using inspection, long division, or, for the more complicated examples, a computer algebra system. CCSS.MATH.CONTENT.HSA-APR.D.6

7. (+) Understand that rational expressions form a system analogous to the rational numbers, closed under addition, subtraction, multiplication, and division by a nonzero rational expression; add, subtract, multiply, and divide rational expressions. CCSS.MATH.CONTENT.HSA-APR.D.7

Skip to main content

Creating Equations

A. Create equations that describe numbers or relationships CCSS.MATH.CONTENT.HSA-CED.A

1. Create equations and inequalities in one variable and use them to solve problems. Include equations arising from linear and quadratic functions, and simple rational and exponential functions. CCSS.MATH.CONTENT.HSA-CED.A.1
2. Create equations in two or more variables to represent relationships between quantities; graph equations on coordinate axes with labels and scales. CCSS.MATH.CONTENT.HSA-CED.A.2
3. Represent constraints by equations or inequalities, and by systems of equations and/or inequalities, and interpret solutions as viable or nonviable options in a modeling context. CCSS.MATH.CONTENT.HSA-CED.A.3
4. Rearrange formulas to highlight a quantity of interest, using the same reasoning as in solving equations. CCSS.MATH.CONTENT.HSA-CED.A.4

Reasoning with Equations and Inequalities

A. Understand solving equations as a process of reasoning and explain the reasoning CCSS.MATH.CONTENT.HSA-REI.A

1. Explain each step in solving a simple equation as following from the equality of numbers asserted at the previous step, starting from the assumption that the original equation has a solution. Construct a viable argument to justify a solution method. CCSS.MATH.CONTENT.HSA-REI.A.1
2. Solve simple rational and radical equations in one variable, and give examples showing how extraneous solutions may arise. CCSS.MATH.CONTENT.HSA-REI.A.2

B. Solve equations and inequalities in one variable CCSS.MATH.CONTENT.HSA-REI.B

3. Solve linear equations and inequalities in one variable, including equations with coefficients represented by letters. CCSS.MATH.CONTENT.HSA-REI.B.3
4. Solve quadratic equations in one variable. CCSS.MATH.CONTENT.HSA-REI.B.4
   a. Use the method of completing the square to transform any quadratic equation in x into an equation of the form $(x - p)^2 = q$ that has the same solutions. Derive the quadratic formula from this form. CCSS.MATH.CONTENT.HSA-REI.B.4A
   b. Solve quadratic equations by inspection (e.g., for $x^2 = 49$), taking square roots, completing the square, the quadratic formula and factoring, as appropriate to the initial form of the equation. Recognize when the quadratic formula gives complex solutions and write them as $a \pm bi$ for real numbers a and b. CCSS.MATH.CONTENT.HSA-REI.B.4B

C. Solve systems of equations CCSS.MATH.CONTENT.HSA-REI.C

5. Prove that, given a system of two equations in two variables, replacing one equation by the sum of that equation and a multiple of the other produces a system with the same solutions. CCSS.MATH.CONTENT.HSA-REI.C.5
6. Solve systems of linear equations exactly and approximately (e.g., with graphs), focusing on pairs of linear equations in two variables. CCSS.MATH.CONTENT.HSA-REI.C.6

Skip to main content

7. Solve a simple system consisting of a linear equation and a quadratic equation in two variables algebraically and graphically. CCSS.MATH.CONTENT.HSA-REI.C.7
8. (+) Represent a system of linear equations as a single matrix equation in a vector variable. CCSS.MATH.CONTENT.HSA-REI.C.8
9. (+) Find the inverse of a matrix if it exists and use it to solve systems of linear equations (using technology for matrices of dimension 3 × 3 or greater). CCSS.MATH.CONTENT.HSA-REI.C.9

D. Represent and solve equations and inequalities graphically CCSS.MATH.CONTENT.HSA-REI.D

10. Understand that the graph of an equation in two variables is the set of all its solutions plotted in the coordinate plane, often forming a curve (which could be a line). CCSS.MATH.CONTENT.HSA-REI.D.10
11. Explain why the x-coordinates of the points where the graphs of the equations y = f(x) and y = g(x) intersect are the solutions of the equation f(x) = g(x); find the solutions approximately, e.g., using technology to graph the functions, make tables of values, or find successive approximations. Include cases where f(x) and/or g(x) are linear, polynomial, rational, absolute value, exponential, and logarithmic functions. CCSS.MATH.CONTENT.HSA-REI.D.11
12. Graph the solutions to a linear inequality in two variables as a half-plane (excluding the boundary in the case of a strict inequality), and graph the solution set to a system of linear inequalities in two variables as the intersection of the corresponding half-planes. CCSS.MATH.CONTENT.HSA-REI.D.12
